Subject Index

Adhesion, P388D1 cells and, 378
AIDS, TH_2 cytokine production and, 147
Allylamine (AAM), vascular injury by, 354
α_v, mRNA levels of, 304
$\alpha_v\beta_3$ integrin
  cell attachment and cell signalling functions and, 139
  migration of smooth muscle cells and, 119
  OPN a major ligand for, 2
  osteoclasts and, 214
  RGD peptides and, 372
  thrombin-cleaved OPN and, 92
Alveolar bone, wound healing and, 168
Amino acid sequences, 6
Animal model of pulmonary fibrosis, 334
Antisense *opn* RNA, 299
Aspartic acid-rich proteins (AARP), mineralization and, 259
Atherosclerosis, OPN protein accumulations in, 112
Adenosine triphosphate (ATP) depletion, 321

Biomaterial for tissue reconstruction, 180
Bisphosphonates, osteoblasts and, 236
Blood coagulation, thrombin cleavage and, 88
BMP-7 (hOP-1), 233
Bone, mouse development and, 367
Bone growth, avian tibial dyschondroplasia and, 350
Bone morphogenetic protein (BMP), OPN message levels and, 247
Bone remodeling
  roles of OPN in, 213
  stages of, 185
Bone resorption, osteoclast integrins and, 198
Bone sialoprotein (BSP)
  hydroxyapatite formation and, 305
  $\alpha_v\beta_3$ integrins and, 193

c-src protein, $\alpha_v\beta_3$ and, 160
Calcitriol, OPN expression in presence of, 25
Calcium levels, intracellular, 137
Calcium oxalate (CaOx), urinary stone formation and, 257
Calcium oxalate crystals, nucleation of, 375
Calcium oxalate renal stones, 266
cAMP, human trophoblasts and, 346
Cardiovascular disease, OPN expression in, 109
CAT activity, hOPN gene and, 51
Cell adhesion
  endothelial and smooth muscle, 116
  RGD sequence of rOPN and, 327
  RGD-mediated, 309
Cell attachment, 8–10
  effects of agents on, 303
  other OPN functions and, 127
  thrombin-cleaved OPN and, 88
Cell growth and differentiation, *Eta-1* gene and, 143
Cell signalling, $\alpha_v\beta_3$ integrin and, 119, 139
Cell-binding domain, GRGDS, 92
Cell-surface-associated fibronectin, pp69 OPN and, 206
Cellular functions, OPN-induced modifications of, 127
Cement layer, preosteoblastic cells and, 236
Cement line
  extracellular matrix protein in bone and, 179
  resorption and, 184
Cementum, adhesion molecules associated with, 167
Chicken osteoblasts, cultured, 357
Chondrocytes
  avian tibial dyschondroplasia and, 350
  promoter sequences and, 76
Circular dichroism, conformation of bone OPN and, 21
Cis-acting regulatory elements, 51
Clear zone, $\alpha_v\beta_3$ integrin in, 218
Cochlea, OPN segregated to, 282
Conformation of OPN, absence of disulfide bonds and, 21
Conserved sequences, 6–9
Crystallization inhibitors, macromolecular, 271
Cytokine, Eta-1/Op and, 145

1,25-Dihydroxyvitamin D_3, calcium mobilization from bone and, 214
Dental pulp, 342
Dephosphorylated OPN, hydroxyapatite formation and, 250
Dephosphorylation, TRAP and, 220
Development, OPN expression during, 36
Differentiation
  formation of bone and, 227
  HL-60 cell, 302
Differentiation of periodontal tissues, pathways for, 173

E. coli, recombinant OPN and, 138
Ear, inner, 279

Endothelial leukocyte adhesion molecule 1 (ELAM-1), 332
Endothelin, OPN mRNA levels and, 247
Epididymis, rat, OPN mRNA and protein in, 361
Eta-1 (early T lymphocyte activation 1) gene
  cell growth and differentiation and, 143
  OPN cloned as, 128
Eta-1/osteopontin, immunological disorders and, 143
Exon/intron organization of hOPN gene, 46
Extracellular matrix
  classification of OPN and, 371
  OPN in, 67
Extracellular matrix molecules, interaction of OPN with, 201

Factor-independent protein kinase, phosphorylation and, 72
Fibronectin, interaction of OPN with, 201
Fourier-transformed infrared spectroscopic studies, 21

Gel shift assay, cis-acting regulatory elements and, 53
Gene expression, 242
Gene expresison of mouse OPN, 35
Gene regulation, 319
Glycosylation, rat bone OPN, 363
Golgi kinases, phosphorylation of OPN by, 296
Growth factors, stimulation of OPN synthesis by, 233
Growth plate, OPN synthesis and chondrocyte differentiation and, 350

HL-60 cell differentiation, 302
Host defences, OPN upregulation and, 138
Human OPN gene, 44
Hydroxyapatite (HA) formation, inhibitory activity of OPN on, 306
Hydroxyapatite affinity, 251
Hydroxyapatite crystals, 20
Hypoxia/reoxygenation, PTE cells and, 135

Immunolabeling, osteoclasts and, 219
Immunolocalization, osteopetrotic (ia/ia) rat and, 317
Immunological disorders, Eta-1/osteopontin and, 143
Immunoreactivity of OPN, hydroxyapatite surfaces and, 21
In situ hybridization, osteoclast OPN mRNA expression and, 193
Inducible nitric oxide synthase (iNOS) mRNA, OPN inhibition of, 133
Inflammation, putative OPN functions and, 1
Inflammatory molecules in pulmonary fibrosis, 339
Integrin
  bone interfaces and, 186
  rOPN and, 312
Integrin subunits, 317
Interaction
  integrin and rOPN, 312
  OPN and extracellular matrix molecule, 201
  other macromolecule, 10
Intercellular adhesion molecule 1 (ICAM-1), 332
Ischemia-reperfusion injury, 322

JB6 cells, phorbol ester-induced expression of OPN in, 24

Kidney, mouse embryo, 370

Lamina limitans, extracellular matrix protein in bone and, 179
Lupus, murine, Eta-1/Op and, 144

Macrophage
  OPN mRNA in, 381
  cardiac injury and, 113
  tumor, 84
Macrophage cell line, 336
Malignancy
  antisense *opn* DNA and, 300
  role of OPN in, 102
Metastases, colon carcinoma, 84
Migration factor, OPN as, 117
Mineralization
  matrix and, 178
  phosphorylated sialoproteins and, 249
Mineralized and nonmineralized tissues of periodontium, 166
Monoclonal antibodies, properties of, against OPN, 310
Monoclonal mouse anti-rat OPN antibody (clone MPIIIB10), 13
Mouse, tooth development in, 171
Mouse development, localization of OPN during, 367
Mouse osteopontin gene, 319
Murine acquired immunodeficiency syndrome (MAIDS), Eta-1/Op and, 145
Mutagenesis of RGD sequence, 327
^{3}H-Myoinositol, phosphoinositides of osteoclast precursors and, 154

N-glycosylation site, NES sequence and, 8
N-linked oligosaccharides, formation between npOPN and Fn and, 204
Neointima, smooth muscle cells forming, 111
Nitric oxide, OPN regulation of, 103
Noncollagenous proteins, 249
Normal rat kidney (NRK) cells, phosphorylation and, 202
Nuclear magnetic resonance (NMR), phosphophoryn's conformation and, 251
Nucleation, crystal, 274
Nucleation of calcium oxalate crystals, 375

Okadaic acid, OPN expression and phosphorylation and, 29
Osteoblast
  avian OPN promoter in, 74
  OPN gene expression in, 242
  regulation of OPN expression in, 223
  resorption and, 181
Osteoclast
  integrin-mediated podosome attachment of, 186
  OPN binding to integrin $\alpha_v\beta_3$ on, 151
  resorptive phase of, 181
Osteoclast anchor, OPN as, in bone, 215
Osteoclast integrin $\alpha_v\beta_3$, PtdIns 3-OH kinase activity and, 151
Osteoclast integrins, interaction of OPN with, 190
Osteopetrosis, osteoclast clear zone in, 315
Osteopontin conformation, 252
Osteopontin expression, regulation of, 102
Osteopontin molecule, functional analysis of, 371
Osteopontin peptide (OPN-A), osteoclast precursors and, 156
Osteopontin-derived peptides, hydroxyapatite formation and, 307
Osteopontin-fibronectin cross-linking, 210
Osteoprogenitor, bone remodeling sequence and, 183
Osteotrophic hormones, OPN expression stimulated by, 231

$p125^{FAK}$ phosphorylation, 135
P388D1 cells, rOPN and, 378
Parathyroid hormone (PTH), TGFβ vs, 243
Paxillin phosphorylation, 135
Periodontal ligament (PDL), cell attachment and, 168
Periodontium, mineralized and nonmineralized tissues of, 166
Peroxide levels, intracellular, 137
Phenotypic modulation of SMCs by allylamine, 355
Phorbol ester, tumorigenesis and, 24
Phosphatidylinositol 3-hydroxyl kinase (PtdIns 3-OH kinase), 152
Phosphoprotein
  clonal dental pulp cells and, 343
  bone matrix, 220
Phosphorylated sites of secreted OPN, 357
Phosphorylation
  44-kDa and 55-kDa OPN and, 232
  conserved sequence and, 8
  Golgi kinases and, 296
  rat bone OPN, 363
Phosphorylation of OPN
  okadaic acid and, 29
  protein kinases and, 40
Polyaspartic acid sequence, 8–9
  avian sequence and, 224
Posttranslational modifications, 363
Posttranslational modifications of OPN, 39
pp69 osteopontin, cell-surface-associated Fn and, 206
Proliferation, SMC, 356
Promoter, Puerap motif in, 319
Promoter sequences, comparison of, 49
Protein kinase C, TPA and, 347
Protein kinases, OPN phosphorylation and, 40
PTE cells, hypoxia/reoxygenation and, 135
Pulmonary fibrosis, animal model of, 334

Ras-transformed cells, regulation and function of OPN in, 101
Rat kidney, 321
Rat *opn* promoter, identification of two separate VDREs and, 61
Receptors, adhesion to OPN facilitated by, 119
Recombinant osteopontin
  cell adhesion and, 104
  E. coli and, 138
  interaction between integrins and, 312
  mutagenesis of RGD sequence of, 327
  P388D1 cells and, 378
  phosphorylation of, 40
Recombinant osteopontin-glutathione-S-transferase (GST) fusion protein
  inhibition potency of, 306
  mAbs raised by, 309
Regeneration, periodontal, 166
Regulatory regions in exon and intron, 56
Regulatory sequences, potential, 49
Renal tubular epithelial cells, 276
RGD motif, Eta-1/Op and, 144
RGD sequence
  avian sequence and, 224

integrin-binding domain and, 70
mutagenesis of, 327
site-directed mutagenesis of, 104
RGD-dependent osteoclast attachment, 218
RNA transcripts, alternative splicing of, 36

Saccule, OPN segregated to, 282
SCC-3 cells, hOPN gene in, 44
Secondary structure, 10
Signal transduction, role for PtdIns 3-OH kinase and c-*src* in, 161
Signal transduction pathway, activation of, by OPN, 324
Signalling, $\alpha_v\beta_3$-dependent, 156
Site-directed mutagenesis of OPN, 104
Soluble OPN, conformational analyses on, 12
Sperm activation, 362
Sperm-egg interaction, 362
src homology domains 2 (SH2) and 3 (SH3), PtdIns 3-OH kinase and, 161
Stria vascularis, marginal cells of, 282
Surface bound OPN, conformational analyses on, 12

Tartrate-resistant acid phosphatase (TRAP), osteoclasts secreting, 219
Testis, rat, OPN mRNA and protein in, 361
12-*O*-Tetradecanoyl-phorbol-13-acetate (TPA), OPN expression and, 346
TH_2 cytokine production, imbalance of, 147
Thrombin cleavage
RS sequence and, 9
tumor/host interface and, 83
Tissue repair, putative OPN functions and, 1
Tooth root, cell adhesion to, 168
TPA-responsive elements, hOPN gene and, 55
Transcriptional regulation of OPN, 1,25-dihydroxyvitamin D_3 and, 59
Transforming growth factor β (TGFβ), transcriptional activity of OPN gene and, 243
Transglutaminase (TG), bovine OPN as substrate for, 363
Trophoblasts, OPN expression in, 346
Tumor necrosis factor-α (TNF-α)
OPN and, 338
pulmonary fibrosis and, 335
Tumorigenesis, promotion phase of, 24
Tumors, OPN expression in, 83
Tyrosine kinase pp^{125FAK}, $\alpha_v\beta_3$ and, 160
Tyrosine phosphorylation, osteoclasts and, 157
Tyrosine residues, OPN autophosphorylated on, 40

Urinary stone formation, OPN in, 257
Uropontin
calcium oxalate formation inhibited by, 252–253
calcium oxalate stones and, 261
concentration of, in mice and rat urine, 271
Utricle, OPN segregated to, 282

Vascular injury, allylamine and, 354
Vascular smooth muscle cells (VSMCs), OPN mRNA expression in, 381
Vascular tissue, OPN regulation of nitric oxide in, 103
Vitamin D response elements (VDREs)
calcitriol and, 25
evidence for two, 59
Vitamin D_3, effect of, on OPN synthesis, 344
Vitronectin receptor, osteoclast adhesion to sialoproteins and, 198
